# PERSONAL AND CONFIDENTIAL

## Payoff Statement and Loan Satisfaction Letter

**To**: Marcela Arenas

**From**: Brendan T. O'Connor, Lender

**Date: July 16, 2026**

**Re: REVISION: Payoff of the Pool Loan dated April 16, 2025, secured against 5146 Adega Way, Bradenton, FL 34211**

Dear Marcela,

Please find the requested payoff amount for the “Pool Loan” for July 17, 2026. I am sorry for the calculation error in the previous letter. I want to emphasize that this is not necessary at this time, but I appreciate and never doubted your commitment to the obligation. This letter sets out the exact payoff amount, how I calculated it, and the simple steps for closing out the loan cleanly.

### Payoff Amount

The total payoff amount, if received by end of day on **July 17, 2026**, breaks down as follows.

| Component | Amount |
|---|---|
| Principal balance after payment #14 (June 29, 2026) | $42,830.71 |
| Accrued interest for payoff on or before Aug 5, 2026 (0 days) | $0.00 |
| **Total payoff due July 17, 2026** | **$42,830.71** |

Because payment #14 was received on June 29, 2026 with the memo "Pool loan payment July 1 2026," that payment satisfied the July 5, 2026 installment ahead of schedule. No further interest accrues for any payoff on or before the next scheduled due date of August 5, 2026, so the payoff figure equals the outstanding principal balance. If the payoff is received after August 5, per-diem interest of $5.87 per day resumes on the unpaid principal at the 5.00 percent annual rate, and I am happy to reissue an updated quote.

### How the Number Was Calculated

The pool loan uses a fixed rate of 5.00 percent APR on the outstanding principal balance. Interest between scheduled monthly payments is calculated on an actual/365 basis, which is the standard method for consumer amortizing loans.

- Outstanding principal after your July payment received June 29, 2026, was $42,830.71.
- Payment #14, received on June 29, 2026, was memoed "Pool loan payment July 1 2026" and satisfied the July 5, 2026 installment early.
- The next scheduled due date is August 5, 2026, so no additional interest accrues for a payoff on or before that date.
- The payoff figure equals the outstanding principal balance of $42,830.71.

No prepayment penalty applies. The original note carries no early-payoff fee, and there are no other charges being assessed.

## How to Pay

I recall you preferred to pay it off via ACH. In the memo field, please write "Pool loan payoff" so I can identify it. If you would prefer to use any other method, just tell me and I will accommodate you.

For my Bank of America Account, I have listed the routing number for ACH payments and my account number below:

Routing number: 125000024

Account number: 138121060710

## What Happens After the Payoff Clears

Once I receive the $42,830.71 in cleared funds, I will do the following within five business days.

1. Send you a written acknowledgment that the loan is paid in full.
2. Provide a final statement showing all fourteen prior payments and the payoff, with a zero balance.
3. Update the private loan statement page at brendoslife.com/marcela to reflect the paid-off status.
4. Prepare and deliver a signed **Release of Loan and Satisfaction of Debt** referencing the property at 5146 Adega Way. This document confirms that no further amounts are owed and that the informal note between us is closed.

Because this loan was documented as a private note rather than a recorded mortgage, no county filing is required to release it. If you would like a notarized copy of the satisfaction letter for your records, I am happy to arrange that as well.

## Send by ACH with memo "Pool loan payoff".

- Payoff due July 17, 2026, is $42,830.71.
- Send by Zelle with memo "Pool loan payoff".
- After funds clear, you will receive a full satisfaction letter, a zero-balance statement, and an updated statement page.

I appreciate how reliably you have handled this loan from the first payment forward. Please let me know if anything above needs adjusting or if you would like the payoff quoted for a different date.

Sincerely,

Brendan T. O'Connor
